

# Meeting 1 18.02.2019

## Opening

> Checking whether all team members are present.

## Approval of the agenda

> Make sure everything that needs to be discussed is in the agenda or add it if something is missing.

## Points of action

- Things to research:

1) Database Options

- JSON
- SQL
- Plain Text

2) GUI

- JavaFX

3) Division of Work.

4) Features of the application in detail. (Such as discussing the GUI, how the application will function)

If there is time:

5) Scrum

- Why should you use it?
- What is a scrum master?
- How are you going to use scrum in the team?
- How will you document the sprints?
- Schedule for taking notes and chairing

## Any other business

>

## Question round

>

## Closing
