

Group 7 – Meeting 1

Team Members Present: 6/7 (Yash Absent)

Application Features:

- Accomplishments (Trophies) for accomplishing certain things which adds to the points gained by the user.
- Long term goals that only need to be accomplished one time by a user (Such as installing a solar panel).
- Daily challenges that the user can complete which gives the user points each day after completing it (Simple challenges such as eating a vegetarian meal once a day or taking the public transport to work)
- A general questionnaire that the user will have to complete at the start to get to know the habits of the user. (Such as “Is he/she is a vegetarian” and accordingly, change the daily and long term challenges)
- The concept of authentication to uniquely identify a user and have the user add friends in the app to see the consumption of friends and bring a competition aspect into the application. (Third Party Application if possible, depending on complexity)
- Discussed some parts of the GUI but not in detail.

Rules and Regulations of the group:

- Not being present in the team meeting is not tolerated. Only valid reasons such as being extremely ill or being out of town is accepted. Nonetheless, the work must be submitted on time regardless (Extreme cases accepted).
- Being late to the meetings is also not tolerated. The maximum extra time that one can be late to the meeting by is 7 minutes.
